Our Story

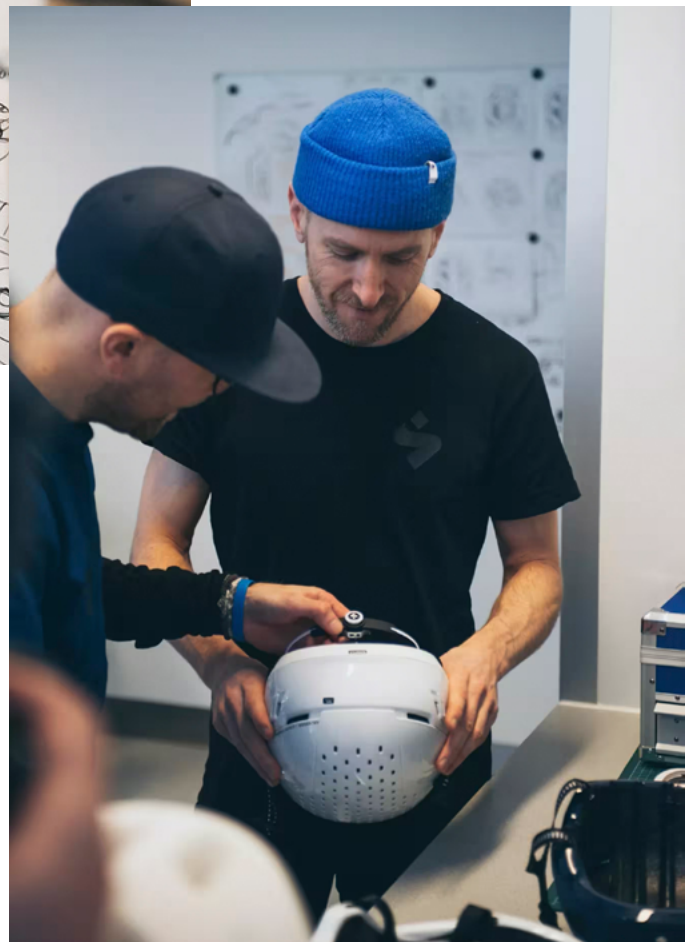

We create superior protection inspiring people to push their boundaries.

Sweet Protection was founded in Trysil, Norway by a tight-knit group of skiers, snowboarders and paddlers. We build the gear we use and stand behind every product we make. We're a small team, and we do everything in-house. From early sketches to prototypes, all the way to full-fledged proprietary technologies challenging the existing norms and benchmarks.

We don't stop at 'good enough', we aim – that's why we developed our own helmet technology and lens technology (RIG®). We always do this in close cooperation with our world-class athletes. Their input is invaluable, and they are an important part of our extended family and development team.

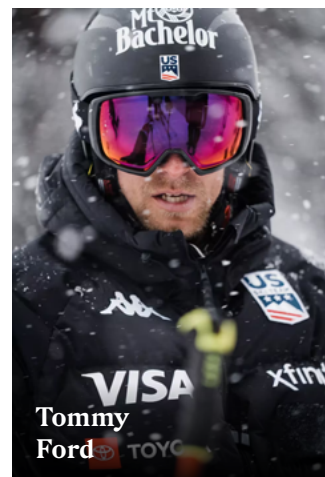

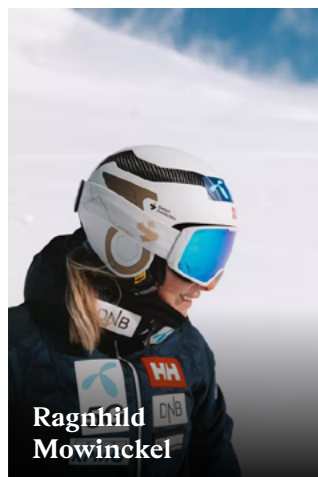

Sweet Protection blends industry-leading innovation with the finest craftsmanship available to create the safest and most advanced helmets, eyewear, protective gear and apparel. We strive to inspire every outdoor enthusiast, from World Cup ski racers to the weekend warriors out with their kids - and everyone in between, to give them the confidence to push their boundaries. If you're not able to push your limits, we're not doing our job.

Our core design philosophy; Stronger, Lighter. Better. – guides all of our decisions. We have extremely high expectations to our products, above and beyond industry certifications and standardized tests. TO us there is no compromise.

Athletes

Our passion is
your protection.
